Lectures on Commerce

340 pp., 8vo, cloth. Net, \$1.50; postpaid, \$1.62

ONE of the most important books that has appeared of late in the field of commercial education is **Lectures on Commerce**, a series of sixteen addresses delivered before the College of Commerce and Administration in the University of Chicago. The reciprocal interest of business men in education, and of educated men in business, is strikingly apparent in the list of lecturers and of subjects in this book. Leading business men discuss the most pressing problems of business life in an entertaining and instructive manner, giving the reader much information that usually is acquired only through long business experience. Railways, Trade and Industry, Banking and Insurance, are the general heads, and under these are grouped the following names and subjects:

J. LAURENCE LAUGHLIN	Higher Commercial Education
A. W. SULLIVAN	Railway Management and Operation
GEORGE G. TUNELL	Railway Mail Service : A Historical Sketch
E. D. KENNA	Railway Consolidation
LUIS JACKSON	Railways as Factors in Industrial Development
PAUL MORTON	Some Railway Problems
FRANKLIN H. HEAD	The Steel Industry
H. F. J. PORTER	The History of the Art of Forging
A. C. BARTLETT	At Wholesale
JOHN LEE MAHIN	The Commercial Value of Advertising
DORR A. KIMBALL	The Credit Department of Modern Business
H. K. BROOKS	Foreign Exchange
JAMES H. ECKELS	The Comptroller of the Currency
	The Methods of Banking
D. R. FORGAN	Investments
A. F. DEAN	Fire Insurance

THE ANGELUS

Since The Angelus was introduced in 1897 it has met with extraordinary success. The best proof of this success is the number of its imitators, a few of which have shared in varying degrees some popularity.

We give only one store in each city or town the sale of our instrument ; so, naturally, rival or competing firms try to find a substitute for The Angelus.

Where Imitators Fail

Real lovers of good piano music (and by "good" we mean correct in technique and artistic in finish) know that a mechanically exact repetition of notes, even though the tempo be changed at intervals and the loud or soft pedal applied occasionally, does not meet their requirements.

The Phrasing Lever

of The Angelus, which, as its name suggests, permits the performer to modulate or "color" any notes, phrases or passages,—together with the device for subduing the accompaniment while bringing out the theme of a composition,—are not found on any instrument but The Angelus.

Send us your name and address and we will take pleasure in mailing free illustrated booklet and the name of the dealer in your vicinity, who will show you an Angelus and the marvelous results you can obtain by its aid.

Russian Political Institutions

By **MAXIME KOVALEVSKY**

Formerly Professor of Public Law at the University of Moscow

A sketch of Russian Political Institutions, past and present. The author's task has been to give a bird's-eye view of the internal development of Russia.

Up to the present time the standard work on Russia for English-speaking peoples has been Mackenzie Wallace's volume. The aim of Professor Kovalevsky's book differs widely. Instead of aiming "to convey a general idea of the country and people" (as Wallace phrases his object), it is essentially expository—the history of an evolution. This history has never before been written in English. In the main the book is one for the student and the scholar, in a much more intimate sense than is, for instance, Professor Bryce's *American Commonwealth*. But the sections dealing with the emancipation of the serfs, local self-government, and, especially, the universities and the press, will be found to contain matter not only not elsewhere accessible, but of universal interest.

Light Waves and Their Uses

With 108 text figures and three colored plates. By **ALBERT A. MICHELSON**.

These lectures, although they lead to the very frontier of physical knowledge, are written in a style readily comprehensible to anyone of average education in physics, and will be found very useful, not only to specialists, but to those who wish to keep informed of recent scientific methods and progress in that field.—*The Independent*.

The book and its subject are fascinating, and we heartily recommend it to any man interested in physical science.—*The Bookseller, Newsdealer, and Stationer*.

Professor Michelson's book is devoted exclusively to an account of his own researches, the great importance and beauty of which are well known. This compact outline of them in a handsome dress will be welcomed by everybody who is interested in optics.—*The New York Evening Post*.

THE DAINTIEST SOAP MADE is HAND SAPOLIO for toilet and bath. Other soaps chemically dissolve the dirt—HAND SAPOLIO removes it. It contains no animal fats, but is made from the most healthful of the vegetable oils. It opens the pores, liberates their activities, but works no chemical change in those delicate juices that go to make up the charm and bloom of a perfect complexion. Test it yourself.

THE FAME OF SAPOLIO has reached far and wide. Everywhere in millions of homes there is a regard for it which can not be shaken. Sapolio has done much for your home, but now for yourself—have you ever tried HAND SAPOLIO, for toilet and bath? It is related to Sapolio only because it is made by the same company, but it is delicate, smooth, dainty, soothing, and healing to the most tender skin. It pleases everyone.

ITS USE IS A FINE HABIT—ITS COST BUT A TRIFLE.

Vose PIANOS
